  - Subjects studied – Standard English; 2 Unit Maths; Geography; Engineering; Software Design & Development.
- 1990 – 1996 Galston Public School

## **WORK EXPERIENCE**

---

### April 2005 **Barmax**

I did a three day course at Barmax where I learnt the finer details of bar work. This consisted of the general running of a bar and how to mix and pour drinks.

### April – June 2005 **Maxton Fox**

In this short period of time I worked as a factory hand for a large office furniture manufacturer. I was required to work efficiently in a team and also independently to keep large quantities of stock under control.

### February 2003 – November 2004 **Paxtons Camera Video Digital**

For 21 months I was employed by a photographic shop as a sales consultant. During this time, I was required to assist the general public with their purchases of all different types of cameras and photographic needs. During this time, I often received bonuses as a result of my high weekly sales. I also attended the “Freedman’s Selling Course” which gave me many wonderful tips on how to sell a product.

### December 2002 – January 2003 **Fletcher Jones Clothing**

For this short period of time I worked in a predominately male clothing store as a sales consultant. As part of my job, I helped customers with their clothing requirements, stock control and general cleaning.

### **December 2002 Comusell**

For 1 week, I worked with a large company as a door-to-door salesman. In this time, I received the highest number of sales within my team of 4.

### **R.G. & M. Whiddon**

For many years, during school holidays and weekends, I have worked with my father. My work with him included carpentry; brick laying; concreting; plumbing; electrical work; gyproking; fencing; landscaping; gardening; stone masonry; architecture and surveying.

### **COMPUTING SKILLS**

---

I am competent with Windows 95, 98, 2000 and XP and can operate Microsoft office software easily. I have intermediate programming skills in Q-Basic and Visual Basic, which are constantly improving. I have taught myself to draw 3D scenes and objects in Bryce 5 and 3D Studio Max, versions 6, 7 and 8, with the aid of online tutorials and internet forums.

### **INTERESTS AND HOBBIES**

---

I have a wide variety of interests and extra curricular activities, with a main focus on sports. I have been involved in team sports such as Rugby League, Cricket, Hockey, Boxing and Swim Club. I also enjoy water skiing, wakeboarding and snowboarding.

I also spend a lot of time expanding my knowledge and skills in 3D modeling.

I was a member of Scouts for 6 years and attended drama school for 2 years. Throughout my time in school, I also volunteered my time to the Salvation Army's Red Shield Appeal and other charity work on numerous occasions

### **REFEREES**

---
